

CITY OF DETROIT
SPECIAL PROVISION
FOR
CEMENT, MODIFIED

1 of 1

DET: MCS

Revised: 06-11-01

"Cement, Modified" shall be performed in accordance with the 2003 MDOT Standard specifications for Construction except that all concrete work in the City of Detroit, including concrete pavement, alley pavement, commercial drives, pavement base, retaining walls, bridge piers, residential drives, sidewalk and curb, shall contain a minimum of 6 sacks/Cyd (564 lbs/Cyd) of Type I Portland cement. This concrete shall produce a minimum of 4,000 PSI compressive strength at 28 days of cure.

The minimum cementitious material content shall be 564 lbs/Cyd for all concrete mixture (See table 605-1 of 2003 MDOT Standard Specifications for Construction).

Changes in cement content must be approved by the Engineer.
