Notes:
 1. Concentrations were compared to EGLE Cleanup Criteria Requirements for Response Activity (CCRA), Effective December 30, 2013 (formerly Part 201 Residential Generic Cleanup Criteria and Screening Levels; Part 213 Tier 1 Risk-Based Screening Levels (RBSLs)).
 2. Utilities are shown at approximate depth and location.
 3. Analytes below EGLE cleanup criteria and laboratory detection limit were not included. Non detects are noted herein.

Legend for Soils:
Bold - Concentrations exceeding the Residential/Nonresidential Drinking Water Protection (DWP) CCRA.
Italic - Concentrations exceeding the Groundwater/Surface Interface Protection (GSIP) CCRA.
 All units measured in $\mu\text{g}/\text{kg}$
 Shaded - Concentrations exceeding the Soil Volatilization to Indoor Air Inhalation (SVII) Criteria
