The material covered by this Certification has been tested according to ISO 9001 standard procedures by our Quality Control Department and complies with all applicable specifications. Quality Control Data to substantiate this certification is on file in our Laboratory.

Potters tests every lot of glass beads produced for use in Highway Markings using XRF technology to insure that Heavy Metals are below the following limits for total content unless lower limits are required by the specification: Arsenic <200ppm, Lead <200ppm, Antimony <200ppm. Test Data is on file in our Quality Lab to support this, and is available upon request. Independent Testing Laboratory results using EPA Methods 3052 and 6010C can also be provided if requested at least 2 weeks in advance of shipment.
