RE: Bagley Streetscape

Good afternoon. This letter is in regards to the ADA-2 truncated dome pavers for the Bagley Streetscape project. We manufactured these pavers to a standard thickness of 2". The 2" paver will carry full warranty if installed in a mortar bed behind curbs at street crossings. Setting them in mortar will allow for the occasional or accidental vehicle driving over them. Wausau Tile sells tens of thousands of ADA truncated dome pavers in this size for this application all over the United States ever year. For this project, Wausau Tile will extend its warranty from 3 to 5 years as a reassurance for using the 2" thick paver. I will be happy to answer any questions pertaining to this matter.

Thank You
Jason Merrick
