Comments

7 am – Major arrived at the work location and set up tools and equipment for the work planned on this day. They commenced the day by removing the blankets from the concrete walls, folding them and removing the excess from the site. They began removing the formwork for the concrete walls after they have cured for several days now and should no longer be green. A small load of the pea gravel concrete mix was delivered shortly later, and they placed the 6" mock up area at the NW corner outside the work site foot print. They sprayed a release agent on the areas to be sand blasted on Monday. They covered the area at the end of the work day for weather protection.

5:30 pm –They continued to remove forms throughout the day. The crews ceased their work for the day, cleaned up, and left for the day.

Soil and Erosion Control:

Silt fencing installed around 2 trees north of the work site

Filter fabric installed in the catch basins

Traffic Control:

type 1 barricades. Barrels around the E, W, S and type III wall barricades protecting the site on the north side along the sidewalk

Project Visitors:

Postings:

None
