Comments

7 am – Major arrived at the work location and set up tools and equipment for the work planned on this day. They continued removing the formwork for the concrete walls. The foreman sand blasted two light areas and two medium areas on mock up area at the NW corner of the job site. They began back filling and grading the work site with the soil removed during the excavations performed at the site. They started at the eastern edge working westward. There are a few soft (spongy) areas which we will allow to dry for a few days to see if they set up. The remaining areas appear to be firming up very well. Major also placed some of the Planting mix in all of the planters.

5:30 pm –They continued to remove forms throughout the day. The crews ceased their work for the day, cleaned up, and left for the day.

Soil and Erosion Control:

Silt fencing installed around 2 trees north of the work site

Filter fabric installed in the catch basins

Traffic Control:

type 1 barricades. Barrels around the E, W, S and type III wall barricades protecting the site on the north side along the sidewalk

Project Visitors:

Postings:

None
