To the Honorable the Common Council:

Gentlemen—The Fire Commission, to whom was referred the resolution of your honorable body, asking for the removal of cisterns from the corners of Lafayette avenue and Twenty-third street, Twenty-third and Porter streets and in front of No. 1210 Chene street, would report as follows:

After investigation by our Superintendent of Water, he finds that the cisterns are in good condition, and that the water mains supplying them are only four inches in diameter with dead ends and poor circulation; that the capacity of the mains is not sufficient to supply our engines in case of fire; that each cistern has a capacity of 7,000 gallons of water, they acting as reserve and are far superior for fire purposes than hydrants would be on these mains.
