

ing the street on the south side side only, to 120 feet is \$4,075,213.00, while the cost of widening to 100 feet is estimated at \$3,592,230.00. No matter what width is determined upon, we believe that a considerable saving will ensue if the two slight angles will be placed in the street as shown upon the plan submitted, which angles will not be noticed when the physical improvement is made.

In our judgment, it is important that the section of Michigan Avenue now 66 feet in width be widened to 120 feet as soon as possible and we urge that the most economical plan which will provide the desired improvement, be adopted.

Respectfully submitted,
WM. R. KALES,
President.
