#### Street Openings.

To the Honorable Common Council:  
Gentlemen—To your Committee on Street Openings was referred the petition of the Chalmers Motor Co., et al (8986) for permission to divert the course of Connor's Creek so as to bring the outlet about 500 feet east of the present one. Your Committee finds that the Chalmers Motor Co. is desirous of making extensions to its present plant and to do so are making the above request. The Board of Health and the Water Board have been consulted by your Committee and the Board of Health has conducted tests to determine the effect of such a change on the water taken in at the water crib at the head of Belle Isle. It is the conclusion of the Board of Health that such a change as is contemplated will have no appreciable effect on the City's water supply if the outlet is carried no further than the present shore line and pursuant to this opinion your Committee, in the following resolution, have provided that in the event of a fill being made to the harbor line, that the outlet of the Creek will be carried to its present location. The Board of Health and Water Board concurring, your Committee recommends that the petition be granted in accordance with the resolution hereto attached.

Respectfully submitted,  
EDWARD BARNETT,  
JAMES VERNOR,  
ALBERT T. ALLAN,  
JOHN A. KRONK,  
JOHN T. THOMPSON,  
F. W. WENZEL,  
HERMAN F. ZINK.

Accepted, and on leave the following resolution was offered:  
By Ald. Barnett:

Resolved, That the course of Connor's Creek, as it now exists across lots 1, 2, 3, 4, 5 and 6, "Plan of the subn. of Private Claims 385 and 386 for the heirs of the late H. Connor" be changed and altered and the said creek located on that part of the east 66 feet of lot 6 extending from the present line of Connor's Creek where the same crosses said lot 6 southerly to the present shore line of Detroit River.

Provided, That in case the petitioners, in future, desire to fill in the territory lying between the present shore line and the harbor line, that the outlet of Connor's Creek be so diverted that the flow may be discharged into the Detroit River at the same place at which is located the present outlet, namely, immediately east of the Detroit Edison Company's plant.
