Honorable Common Council:

Gentlemen — Contract PW-1071-B2 is for the construction of the Substructure of the Freud Pumping Station. Kenny Construction Company is the Contractor. The Superstructure, which is built on the Substructure, is by another Contractor.

The Drawings for the Substructure Contract provided that pockets were to be left in the concrete motor floor for the steel columns that were to be furnished and set under the Superstructure Contract. After the columns were set, the pockets required a concrete fill. Neither the Superstructure Contract nor the Substructure Contract required such fill.

It was determined that it would be more efficient, and involve the least cost, to have the fill made by Substructure Contractor, the Kenny Construction Company. This Contractor has submitted a price of \$1,544.06 for this work which has been checked and found to be correct, fair, and reasonable for the work involved. It is, therefore, recommended that this extra work be added as an addition

to the existing Contract, PW-1071-B2. It is our understanding that funds are available in Account No. 925-2390-931.

Respectfully submitted,
CARL D. WARNER,
Commissioner.

By Councilman Wise:

Resolved, That the additional work of filling the pockets around the bases of the Superstructure columns with concrete at the Freud Pumping Station be added as an extra to the existing Contract for the Freud Pumping Station Substructure, Contract PW-1071-B2, in the amount of \$1,544.06, in accordance with the foregoing communication; and be it further

Resolved, That the Controller be and is hereby authorized and directed to honor vouchers when presented covering this additional work and charge the cost to Account No. 925-2390-931.

Adopted as follows:

Yeas — Councilmen Beck, Connor, Rogell, Smith, Van Antwerp, Wise, Youngblood, and President Miriani—8.

Nays—None.

Honorable Common Council:

Gentlemen—Your Committee of the Whole referred to this office for investigation and report petitions requesting the conversion into easements of the alleys described in the attached resolution.

The conversion of the alleys into easements was approved by the City Plan Commission at an earlier date.

We wish to advise that our investigations are completed. In reply to our inquiries, all City departments and privately owned utility companies reported that they will be unaffected by the changes or that they have no objection to the conversion of the alleys into easements provided that proper provisions are incorporated into the vacating resolution protecting

their interests in the installations located in the alleys.

We recommend the adoption of the attached resolution.

Respectfully submitted,
CARL D. WARNER,
Commissioner.
