Detroit Housing Commission

Honorable Common Council:
Gentlemen—We wish to advise that in carrying out the development plan for the rehabilitation of the blighted area known as the Medical Center Project No. 1, Michigan R-35, which is being undertaken by the City of Detroit, it will be necessary to widen Mack Avenue and John R. Street and to relocate the St. Antoine-Beaubien out off within the limits of the project.

The Housing Commission is anxious to proceed with the physical

improvements in the above-mentioned project and has been advised by the City Engineer's Office that the paving of the streets heretofore mentioned cannot begin until the necessary land is allocated for street widening and relocation.

In view of the foregoing, it will be necessary to adopt the attached resolution allocating the necessary land for the widening of Mack Avenue and John R. Street and for the relocation of the St. Antoine-Beaubieu cutoff within the limits of the Medical Center Project No. 1.

Respectfully submitted,
ROBERT D. KNOX,
Director-Secretary.

Municipal Parking Authority January 16, 1963.

Honorable Common Council:

Gentlemen—We have received a request from Mr. Robert S. Reason, Budget Director, that consideration be given to reducing the parking rate from 50c to 40c on the two temporary parking lots that we are operating at 610 Macomb Street and 680 Monroe Street. Both lots are currently being used by personnel of Receiving Hospital, with the Hospital paying the Municipal Parking Authority at the rate of 50c per parking act. A reduction in the parking rate to 40c would decrease the cost borne by Receiving Hospital in paying for the above parking.

When the two lots were initially put into operation, estimates indicated that a 50c fee would need to be charged to insure our recapturing development costs within a one-year period. These costs have now been amortized.

Present studies show that the proposed 40c rate in conjunction with a recently granted rental reduction on the 610 Macomb Lot would permit us to adequately cover cost of operations
