Detroit Thermal is a district energy company serving numerous customers in downtown Detroit. Steam supplied by Detroit Thermal is used for heating, domestic hot water, food service as well as cooling. Detroit Thermal has a 10 inch steam main running approximately 10 feet deep across the Northwest portion of the property between First and Grand River. (See attached sketch)

The sub Surface Easement of this area may expose this steam line. If this steam line is not re-designed and re-routed, a catastrophic steam leak could occur.

The estimated cost to re-route this portion is approximately \$285,000.
