I am fine with a temporary installation until Council has a chance to consider the encroachment petition. Please coordinate with our Permits Office at 642 CAYMC, [313-224-3970](tel:313-224-3970), about the issuance of an at-risk ROW Permit. I am unsure if we have any conflicting construction zones that may disrupt your schedule. They will be able to assess the conditions and advise you.

Rich

 Hi Richard,

I hope all is well with you?

I wanted to followup on our conversation and subsequent email. The Henry Ford Health System and I have been in regular communication about the new location at 1515 Woodward; and they are very excited about getting their Zagster bike share station installed in time for their media event planned for next Wednesday July 29th.

The chat I had with you was to allow Zagster to install a temporary and moveable bike rack in place until my official application has a ruling. Are we OK'd to install a temporary rack this week?

Thanks so much for all your help.

Best,
 Kevin

Hi Richard,

It was great to speak with you Friday and I appreciate your assistance in getting temporary approval until the city makes a ruling.

To recap our conversation Zagster has partnered with the Henry Ford Health System to offer our bicycle sharing service outside their new clinic location at 1515 Woodward Ave in Detroit. I am requesting an At Risk/Right of Way approval to place our bicycles and rack on Wednesday July 15, 2015.

The temporary bike rack will be freestanding and can be moved should the need arise. It will be located directly in front of the glass windows and will not obstruct any exits or utilities. I am attaching a photo containing a 5 bicycles and a freestanding rack as an example of what will be placed at 1515 Woodward

Ave. I am also attaching the City of Detroit permit application showing a photo of the proposed location and the exact specifications for the rack.

Let me know if there is anything else needed.

Thank You.
