Keith,

Dave is out on vacation starting today and all of next week. Please let me know if there are any other requests or questions on this petition during his absence, and I will do my best to get answers for you.

Per the DWSD request below, I have provided the detail below which we received from the Architect for the canopy support fasteners. The depth would be 42" for frost. Please let me know if there are any concerns with this fastener type/plan.

Thank you!

Breanna Anderson

David,

Per request from DWSD we need the mounting depth.

Good afternoon Gentlemen,

For encroachments such as the Petition 1819 where items are mounted into the ground, can the petitioners please be asked to provide the depth below ground of the mounted items not just the width/length/height?
Thanks

Best Regards,

Debra Singleton

Keith:

Attached is an exhibit showing the awning. The location of the poles is not exact, I am sure they will be away from the curb and attached to the walk from the surface. The fasteners will not extend deeper than the sidewalk section.

Thank you,

David A. Rzyzi, P.E.

Brian;

Attached is the final encroachment exhibit the City will use to process the petition. FYI.

Thank you,

Dave.

Dave,

I updated the exhibit to include the dimension to the corner of the property line, as requested from the City.
(see attached)

Thanks,

Breanna

Dave:

Please add that actual measurement and send it back to me so I can get this process started.

Dave,

The dimension he is asking about should actually be **5.3 ft** from the property line to the beginning of the encroachment. It is the angled dimension to the ramp that is 6 feet (for walking space). Please let him know, and if I need to add that dimension to show it, I can do that too.

Thanks,

Breanna Anderson

Good afternoon Dave:

Attached is the revised Petition drawing for your review and approval. Look at the northeast corner where the measurement from the property line to the beginning of the encroachment on Farmer St. is 6 ft.

Please verify.
