RE: Petition Request for Eastside Community Network

Dear the Honorable Detroit City Council,

Eastside Community Network (ECN) is seeking approval to place a concrete curb inlet and trench drain in the right-of-way in front of the following properties: 5503, 5511, and 5517 Newport Street. These addresses represent three vacant parcels owned by ECN.

ECN has received a grant from the Kresge Foundation to build a stormwater park in the Chandler Park neighborhood to serve as a park/community gathering space and outdoor learning lab as well as to help manage stormwater in the neighborhood. The proposed park is located on corner lots across from Hamilton Academy, a K-8 school.

The concrete curb inlet and trench drain are proposed in the right-of-way to collect stormwater from Newport Street and divert it into two proposed rain gardens, which will be located within the property owned by ECN. In addition to rain gardens, the park provides community and school amenities such as interpretive signage, benches, picnic tables, and an outdoor classroom. The plans for the park, as well as a model of the proposed inlet and trench drain, are attached to this letter.

Construction for this project will occur in spring 2018. Included with this letter are two renderings of the site. We have hired InSite Design to assist with the planning and implementation of this project.

Sincerely,

Donna L. Givens

Donna Givens
President/CEO
