

Status Report for 2018 petition #451

April 15, 2020

This petition is by Perfect Cleaners and is a request for berm parking on Edinborough and McNichols.

The location is on Map 114. The city clerk request is dated 7-17-18. This petition file contains only a sketch dated 12-18-18. The city sketch is different from the original request. The original request was for pull in parking on the berms of both the N side of McNichols and the W side of Edinborough. The sketch is for parallel parking only on Edinborough. Traffic Engineering is an important component to any berm parking and by the change from the request to the sketch they were probably consulted. There is a notation on the request dated 6-7-19 stating "email TED in order to check on the status of their comments".

This petition was probably circulated, but there are no replies in the petition folder. Keith may have more information regarding this petition. There would really be not much benefit to the petitioner as they are looking for more parking unless they could design something acceptable to TED.

In conclusion this petition appears to be incomplete and in a static condition.
