To Whom It May Concern:

We are asking to allow for the encroachment over a city sidewalk at 7968 Kercheval. The encroachment is located on the east side of the building and is for a small canopy over a door. The canopy is ten feet, nine inches above the sidewalk and is five feet, eight inches wide. The canopy is four inches thick. The canopy will project out two feet 5 inches above the sidewalk. There are currently no overhead utilities on that side of the street.

Thank you for your consideration in this matter,

Jason B. Senior
