Hello – the existing utilities can stay in the proposed ROW along rear of Roselawn Street properties. Our design shows the construction following the East side of the property there.

However, some of these poles may require some maintenance. There are a few poles with hanging Comcast wires and leaning. But they will not require relocation or vacation. Please let me know if you'd like me to send photos.

Thank you and let me know if there is more information you need at the moment.

Good Afternoon,

Comcast has facilities in the area, specifically along the north side of Schoolcraft St, and along rear lots of Roselawn St properties. Can you please confirm whether existing utilities can stay in the proposed ROW, or will they need vacated/relocated?

Respectfully,

Andrew Cousino

Thank you for this information. I'm unclear on how the ROW dedication application would affect the current location of the Comcast facilities.

Do you have contact information for who I should contact at Comcast to understand the issue?

Thank you.

Good afternoon,

In response to your utility request for the above project, please refer to the attached map for the location of Comcast CATV/FIBER facilities. Aerial cables are highlighted in orange for fiber and yellow for coax cable. Underground is highlighted in blue for fiber and green for coax cable. There is also additional fiber indicated in the project area but it is unknown if it is aerial or underground. Please reach out to Comcast for additional information. If we can be of further assistance, please feel free to contact us by email at cccutilityrequests@teamsigma.com.

Respectfully,

SIGMA TECHNOLOGIES
