IKE Smart City

RE: IKE Smart City digital information kiosk installation on Randolph St & Centre St.

On behalf of the Downtown Detroit Partnership, I am pleased to express our support for the installation of an IKE Smart City digital information kiosk at the corner of Randolph St & Centre St.

We have received confirmation from the Public Lighting Authority (PLA) that the light pole previously located at this intersection will not be reinstalled. Accordingly, the planned kiosk installation may proceed as scheduled.

The placement of this digital kiosk will benefit pedestrians and visitors by enhancing navigation, improving accessibility, and providing valuable real-time information about Downtown Detroit. Additionally, it will contribute positively to the streetscape and help promote the local business community to the broader public.

We look forward to seeing the kiosk installed later this year and appreciate the continued efforts to enhance the downtown experience.

Sincerely,

Elise Fields  
Sr. Director, Urban Innovation
