DTE Gas
Paradise Valley Conservancy Alley Renovation Project

To Whom It May Concern,

Roncelli confirms that, prior to any excavation activities required for the project, Miss Dig will be contacted to provide utility locates within the excavation area. All drilling, boring, and excavation work will be conducted outside of the Miss Dig caution zone for DTE Gas Company assets.

No structures will be placed over existing DTE Gas Company facilities, and the proposed work will not interfere with or impede the operation, maintenance, or potential replacement of these assets.

Sincerely,

Carl P Roehl
